Maddalena Mometti

Andrea Montero

Andrea Vassallo

Special Educational Needs Department: Blessing Santander

Head of MYP: Ms. Manso

Personal Project at a glance

The Personal Project is a self-directed learning journey in which you explore something personally meaningful, apply ATL skills, create a product and reflect on your growth.

Stage	What it means
1. Choose	Start from a genuine interest and define what you want to learn.
2. Plan	Create a product goal, measurable success criteria and a realistic action plan.
3. Act	Research, create and document how you use ATL skills.
4. Reflect	Evaluate your product and explain how the project affected your learning.

Three things you will submit

Process Journal	Product / Outcome	Final Report
Ongoing evidence of planning, research, decisions, ATL development and reflection.	The actual thing you create, build, perform or produce as a result of the project.	A written and/or recorded explanation of your process, learning and product.

Evidence matters

Whenever something important happens in your project, record who was involved, what happened, when it happened, where it happened and why it matters.

Academic integrity

Your supervisor may guide you, ask questions and give feedback, but the thinking, decisions, writing and product must be your own work.

What makes a strong Personal Project?

- Motivation: you explore an area that genuinely interests you.
- Agency: you set your own goal, decide how to achieve it and define what success will look like.
- Lifelong learning: you develop ATL skills and reflect on the impact of the project on yourself and/or your community.

Nature of the MYP Personal Project

The Personal Project gives students an opportunity to undertake an independent, age-appropriate exploration into an area of personal interest. Through inquiry, action and reflection, students demonstrate and strengthen their Approaches to Learning (ATL) skills.

Element	What this looks like
Motivation	Explore an area that motivates and interests you.
Agency	Set your own goal, choose how to achieve it and define your own articulation of success.
Lifelong learning	Demonstrate and develop ATL skills, then reflect on the impact of the project on yourself and/or your community.

The inquiry-action-reflection cycle

INQUIRE	ACT	REFLECT
Explore an interest that is personally meaningful and set a challenging learning goal.	Transfer and apply skills to achieve your learning goal and create your product.	Recognize and evidence personal growth, evaluate the product and reflect on your learning.

Why the Personal Project matters at H-FARM

The Personal Project is a mandatory component for students in MYP5. According to the Evaluation Regulations, it is treated as a subject and is assigned a weekly double period. During these sessions, students are supervised by an assigned teacher.

The three assessment criteria

Criterion	Learning goal	Product
A - Planning	State a learning goal and explain how a personal interest led to it.	State an intended product, develop appropriate success criteria and present a detailed plan.
B - Applying skills	Explain how ATL skill(s) were applied to help achieve the learning goal.	Explain how ATL skill(s) were applied to help achieve the product.
C - Reflecting	Explain the impact of the project on yourself or your learning.	Evaluate the product based on the success criteria.

A useful mental model

Plan what you will learn and make. Act while documenting evidence. Reflect using specific examples.

PP Calendar 2026-2027

The calendar below is the official working schedule.

Date	Activity / Milestone	Responsible
Sept 1	PP Launch Assembly at the Gym: introduction to requirements, criteria, timelines and exhibition. Begin exploring interests, learning goals and possible products.	PP Coordinator / Supervisors
Sept 8	Lesson: Criterion A expectations. Supervisor welcome message to students and parents. Submit preliminary learning goal and product idea. Begin Process Journal.	PP Coordinator / Supervisors / Students
Sept 15	Lesson: ATL Skills. Identify and justify the Global Context. Select 2-3 ATL skills for intentional development. Begin reliable research. Submit final learning goal and product idea.	Students / Supervisors
Sept 22	Lesson: Success Criteria. Create and justify criteria using research. Upload success criteria to ManageBac. Checkpoint: goal, product and feasibility approval. **MYP Open Night.**	Students / Supervisors
Sept 24	**Personal Project Parent Workshop – Online** *8:45–9:30 AM*	PP Coordinator/Parents
Sept 29	Academic Integrity, AI and Turnitin lesson. MLA citation workshop. Source evaluation and bibliography creation. Research and source collection in the Library. Continue Process Journal.	PP Coordinator / Librarian / Students
Oct 1	**Personal Project Parent Workshop – In Person (MYP Building)** *8:45–9:30 AM*	
Oct 6	Lesson: Action plan timeline. Continue Process Journal. Process Journal Process Journal *Audit #1: A set of meaningful, well-developed entries that demonstrate progress (around 5 entries as a guideline).*	Students / Supervisors
Oct 13	**Criterion A Report Draft Submission**: learning goal, product description, research summary, source evaluation, action plan, success criteria and Works Cited. Academic Integrity Entry #1.	Students / Supervisors
Oct 20	Criterion B expectations and ATL through action. Product development begins. Research finalized and Works Cited uploaded to ManageBac. Criterion A feedback uploaded.	Students / Supervisors
Oct 27	AUTUMN BREAK.	
Nov 3	Continue product development. Explicitly document how ATL skills are being applied to complete the product.	Students / Supervisors
Nov 10	Document ATL growth with evidence in the Process Journal: how ATL skills are applied to achieve the learning goal.	Students / Supervisors
Nov 17	Product development continues. Document ATL growth with evidence in the Process Journal.	Students / Supervisors
Nov 24	Continue product development and ATL evidence. Review research, ATL development, action plan and product progress. Checkpoint: ATL development + Criterion B evidence. Process Journal *Process Journal Audit #2: A set of meaningful, well-developed entries that demonstrate progress (around 10 entries as a guideline).*	Students / Supervisors / PP Coordinator
Dec 1	Product development continues. Document ATL growth. Review research, ATL development, action plan and product progress. Academic Integrity Entry #2.	Students / Supervisors
Dec 8	**Criterion A+B Report Draft Submission**. Product should be substantially completed (approximately 80-100%).	Students / Supervisors

Date	Activity / Milestone	Responsible
	Students **start preparing for the Personal Project Exhibition**, considering how they will showcase their product, learning process, and key reflections.	
Dec 15	At-Risk Student Review Meeting with parents, if necessary. Plan final steps before the break.	Students / Supervisors / PP Coordinator
Dec 21-Jan 6	CHRISTMAS BREAK.	
Jan 12	**Final Product Completion Deadline.** Criterion C workshop: collect feedback from users, audience, experts or stakeholders. Evaluate product against success criteria using evidence. Criterion B feedback uploaded.	Students / Supervisors
Jan 19	Criterion C Strand i: explain the impact of the project on yourself or your learning. Upload reflection to ManageBac.	Students / Supervisors
Jan 26	Criterion C Strand ii: reflect on personal growth and ATL skill development. Document impact on learning and future goals. Poster draft ready. Parent Exhibition Information Letter. *Process Journal Audit #3: A set of meaningful, well-developed entries that demonstrate progress (around 15 entries as a guideline).*	Students / Supervisors
Feb 2	Complete exhibition preparation and rehearsal. Draft display boards, videos, models and presentations. Supervisor review of exhibition materials.	Students / Supervisors
Feb 9	**Complete Draft Report Submission (Criteria A+B+C).**	Students / Supervisors
Feb 11	**PERSONAL PROJECT EXHIBITION:** product display and presentation; video recording of selected projects.	Students / Supervisors / PP Coordinator
Feb 16	BREAK.	
Feb 23	Begin report revisions. *Process Journal Audit #4: A set of meaningful, well-developed entries that demonstrate progress*	Students / Supervisors
Mar 2	Continue report revisions. Final review against criteria.	Students / Supervisors
Mar 9	**FINAL PERSONAL PROJECT SUBMISSION:** final report (max. 15 pages plus bibliography), Turnitin Originality Report and signed Final Academic Integrity Declaration.	Students / Supervisors
Mar 16	Internal standardization and selection of projects for school records.	Supervisors / PP Coordinator
Mar 30	Final internal moderation and completion of assessment documentation.	Supervisors / PP Coordinator
September	Communication of final Personal Project results once IB moderation processes are completed.	PP Coordinator

If a student falls behind

The school may implement an internal suspension only after previous support measures have been used, including regular supervisor check-ins and communication between school and home. During this intervention, the student works under the supervision of the PP Coordinator, PP supervisor or Learning Support team to complete outstanding work and remains responsible for catching up on missed lessons.

Roles and responsibilities

The role of the supervisor

- Guide students through the process and completion of the project, including through guiding questions.
- Ensure the chosen topic meets appropriate legal and ethical standards relating to health and safety, confidentiality, human rights, animal welfare and environmental issues.
- Provide guidelines, deadlines and assessment criteria.
- Advise students on how to keep and curate evidence of the process in ManageBac.
- Emphasize personal analysis and reflection.
- Provide formative feedback.
- Support academic integrity and confirm the authenticity of submitted work.
- Assess the project using the criteria in this guide and participate in standardization.
- Provide teacher-assessed totals to the MYP Coordinator for entry into IBIS.

The role of the student

- Explore an interest that is personally meaningful.
- Take ownership of learning through self-directed inquiry.
- Transfer and apply skills to a learning goal and the creation of a product.
- Recognize and evidence personal growth and development.
- Establish a goal, action plan and success criteria.
- Apply ATL skills throughout the project.
- Gather evidence of how ATL skills were applied and record it in ManageBac.
- Evaluate the product based on the success criteria.
- Select evidence to include in the report.
- Reflect on the impact of the project.
- Write the report, meet school deadlines and engage in the exhibition.

The role of the community

- Members of the internal and external community may support research and product development as resource people or advisers.
- The student must remain responsible for developing both the process and the product.

Using ManageBac to document the process

ManageBac is the platform used to record findings, data and general project information. This includes your project goal, Process Journal entries and meeting notes. You will also upload your final report and evidence of your product to ManageBac.

Gathering evidence

You are expected to document the process you followed. Evidence should show how you developed ATL skills and maintained academic integrity. You may use written, visual, audio and digital formats, or a combination of them.

Good evidence can include	Examples
Planning and thinking	Mind maps, bulleted lists, charts, notes, short paragraphs, timelines and action plans.
Research	Annotated research, source evaluations, bibliography notes and screenshots.
Making / creating	Photographs, sketches, prototypes and annotated illustrations.
Experiences	Artifacts from visits to museums, performances or galleries.
Audio / visual	Up to 30 seconds of visual or audio material, where appropriate.
Feedback	Self-assessment, peer assessment and supervisor feedback.

Remember

The Process Journal is not extra work added at the end. It is an evolving record gathered throughout the project.

Evidence of the process IS

- Gathered throughout the project to document its development.
- An evolving record of intentions, processes and accomplishments.
- A collection of initial thoughts, brainstorming, lines of inquiry and further questions.
- A record of interactions with sources such as teachers, supervisors and external contributors.
- A record of selected, annotated and/or edited research and bibliography development.
- A collection of useful information such as quotations, pictures, ideas and photographs.
- A place to explore ideas and solutions, evaluate completed work and reflect on learning.
- Created in a format that suits the student's needs.
- A record of reflections and formative feedback.

Evidence of the process IS NOT

- Something that must be collected daily unless daily entries are useful.
- Something written up only after the process has been completed.
- Additional work on top of the project; it is part of the project.
- A diary with detailed writing about every action unless this is useful.
- A single static document in only one format unless that format genuinely works for the student.

Academic integrity and assessment

Academic integrity

The Personal Project report must be the student's own work and must follow the H-FARM International School Academic Integrity Policy. Cases of academic dishonesty may be reported to IB and can lead to disqualification. Students must complete and sign the Academic Honesty Form.

Assessment and moderation

The Personal Project is the only MYP component that is internally standardized and externally moderated. After reports are submitted, teachers mark and standardize projects to ensure accuracy and consistency. Predicted marks and a random sample are then submitted to IB for moderation.

Final grades

The original guide states that IB communicates final Personal Project grades to the school on August 1, 2027.

Criterion A: Planning

In the Personal Project, students should be able to:

- Strand i: state a learning goal for the project and explain how a personal interest led to that goal.
- Strand ii: state an intended product and develop appropriate success criteria for that product.
- Strand iii: present a clear, detailed plan for achieving the product and its associated success criteria.

Level	Descriptor
0	The student does not achieve a standard described by any of the descriptors below.
1-2	States a learning goal; states the intended product; presents a superficial plan or one not focused on a product.
3-4	States a learning goal and outlines the connection to personal interest; presents basic success criteria; presents a plan for the product and some associated success criteria.
5-6	States a learning goal and describes the connection to personal interest; presents multiple appropriate success criteria; presents a detailed plan covering most success criteria.
7-8	States a learning goal and explains the connection to personal interest; presents multiple appropriate, detailed success criteria; presents a detailed plan covering all success criteria.

Key terms

Term	Meaning
Learning goal	What students want to learn as a result of doing the Personal Project.
Product	What students will create for the Personal Project.
Present	Offer for display, observation, examination or consideration.
State	Give a specific name, value or brief answer without explanation or calculation.
Outline	Give a brief account or summary.
Describe	Give a detailed account or picture of a situation, event, pattern or process.
Explain	Give a detailed account including reasons or causes.

Defining your project

The Personal Project is personal because you set your own goal based on something you find interesting. Inspiration can come from MYP experiences, service as action, units of inquiry, hobbies or new interests.

- What have you always wanted to do?
- What do you do in your free time - or what would you like to do?
- Which IB Learner Profile attribute best describes you? Which would you like to develop?
- Which Global Context interests you most?
- Which interdisciplinary, design or Service as Action experience did you find most satisfying?

- What problem in your community matters to you?
- Which academic discipline or research area would you like to explore further?

Two connected parts

Learning goal	Product
What you want to learn.	What you want to create.

A project can evolve

The starting point may be the learning goal or the product, and either can change if necessary during the process.

Examples

- I want to learn about fitness by training for a half-marathon.
- Research violin design and making, then design and produce an electric violin.
- Learn about current fashion trends and pattern design, then create a summer clothing collection.
- Learn how to build a professional website template to market a family jewellery business.
- Volunteer at a local dog rescue centre and organize a food-collection initiative.
- Take part in an environmental campaign and design a community awareness campaign.

Success criteria for the product

Success criteria define the degree of excellence the product aspires to and the terms under which it can be judged successful.

- Criteria must be testable, measurable and observable.
- Criteria must evaluate the product.
- Criteria should consider impact on the student or community where relevant.
- Use SMART specifications: Specific, Measurable, Achievable, Relevant and Time-bound.

Product form	Product content
Technique or material used; number of pages; length; visual aspects; colours; size; text type.	Strand; target audience; organization; quality of language; result achieved.

Action plan / calendar

Working within the school timeline, students should create a timetable that gives an overall view of everything they need to achieve, then add daily or weekly details as appropriate. The plan must show how the product will be created and how the success criteria will be fulfilled.

Phase	Typical actions
Planning	Define the project, develop success criteria and present a detailed plan.
Applying skills	Achieve the learning goal and complete the product.
Reflecting	Explain the impact of the project and evaluate the product against the success criteria.

Keep the plan alive

Regularly revisit the plan and document any changes to expected deadlines. Useful formats include a Gantt chart, timeline or action plan.

Criterion B: Applying skills

In the Personal Project, students should be able to:

- Strand i: explain how ATL skill(s) were applied to help achieve the learning goal.
- Strand ii: explain how ATL skill(s) were applied to help achieve the product.

Level	Descriptor
0	The student does not achieve a standard described by any of the descriptors below.
1-2	States which ATL skill(s) were applied to the learning goal and product.
3-4	Outlines which ATL skill(s) were applied, with superficial examples or evidence.
5-6	Describes how ATL skill(s) were applied, with reference to examples or evidence.
7-8	Explains how ATL skill(s) were applied, supported with detailed examples or evidence.

ATL skill clusters

Communication, collaboration, organization, affective, reflection, information literacy, media literacy, critical thinking, creative thinking and transfer.

What working through the project can involve

- Planning financial, human and material resources and constraints.
- Producing drafts, sketches, prototypes and plans.
- Choosing information, techniques and materials based on research.
- Testing techniques and materials.
- Compiling purchase lists and predicting alternatives.
- Planning documents such as surveys, letters, posters or visual aids.
- Preparing interviews, surveys, meetings and presentations.
- Practising presentations and creating the product.
- Regularly assessing progress through self-assessment or feedback from others.
- Making necessary improvements and presenting the final product.

Approaches to Learning (ATL) skills

How to use this section

Choose the specific ATL skills that genuinely support your project. Then collect concrete evidence showing how you used them.

Communication skills

Exchanging thoughts, messages and information effectively

- Give and receive meaningful feedback.
- Use intercultural understanding to interpret communication.
- Use a variety of speaking techniques for different audiences.
- Use appropriate forms of writing for different purposes and audiences.
- Use a variety of media to communicate with a range of audiences.
- Interpret and use non-verbal communication effectively.
- Negotiate ideas and knowledge with peers and teachers.
- Participate appropriately in digital social media networks.
- Collaborate with peers and experts in digital environments.
- Share ideas with multiple audiences using different media.

Reading, writing and using language to gather and communicate information

- Read critically and for comprehension.
- Read a variety of sources for information and pleasure.
- Make inferences and draw conclusions.
- Use and interpret discipline-specific terms and symbols.
- Write for different purposes.
- Understand and use mathematical notation.
- Paraphrase accurately and concisely.
- Preview and skim texts to build understanding.
- Take effective notes and make effective summary notes.
- Use organizers for academic writing tasks.
- Find information for disciplinary and interdisciplinary inquiry using varied media.
- Organize and depict information logically.
- Structure information in summaries, essays and reports.

Social: collaboration skills

- Use social media networks appropriately to build and develop relationships.
- Practise empathy.
- Delegate and share responsibility for decision-making.
- Help others succeed and take responsibility for your own actions.
- Manage and resolve conflict and work collaboratively in teams.
- Build consensus and make fair, equitable decisions.
- Listen actively to other perspectives and ideas.
- Negotiate effectively and encourage others to contribute.
- Exercise leadership and take on different roles within groups.
- Give and receive meaningful feedback.
- Advocate for your own rights and needs.

Research skills

Information literacy

- Collect, record and verify data.
- Access information to be informed and to inform others.
- Make connections between sources of information.
- Understand the benefits and limitations of personal sensory learning preferences when accessing, processing and recalling information.
- Use memory techniques to support long-term memory.
- Present information in a variety of formats and platforms.
- Collect and analyze data to identify solutions and make informed decisions.
- Process data and report results.
- Evaluate and select sources and digital tools based on task appropriateness.
- Understand and use technology systems.
- Use critical-literacy skills to analyze and interpret media communications.
- Understand and implement intellectual property rights.
- Create references and citations and construct a bibliography using recognized conventions.

Media literacy

- Locate, organize, analyze, evaluate, synthesize and ethically use information from a variety of sources and media.
- Demonstrate awareness of media interpretations of events and ideas.
- Make informed choices about personal viewing experiences.
- Understand the impact of media representations and modes of presentation.
- Seek multiple perspectives from varied sources.
- Communicate information and ideas effectively to multiple audiences using different media and formats.
- Compare, contrast and draw connections among multimedia resources.

Self-management skills

Organization skills

- Plan short- and long-term assignments and meet deadlines.
- Create plans to prepare for summative assessments.
- Keep and use a weekly planner.
- Set challenging but realistic goals.
- Plan strategies and take action to achieve personal and academic goals.
- Bring necessary equipment and supplies.
- Keep an organized, logical system of information files and notebooks.
- Use appropriate strategies for organizing complex information.
- Understand and use sensory learning preferences.
- Select and use technology effectively and productively.

Reflection skills

- Develop new skills, techniques and strategies for effective learning.
- Identify strengths and weaknesses in personal learning strategies.
- Demonstrate flexibility in selecting and using learning strategies.
- Try new ATL skills and evaluate their effectiveness.
- Ask: What did I learn today? What do I still not understand? What questions do I have now?
- Ask: What can I already do? What will I work on next? How can I share skills with peers?
- Ask: What can I do to become a more efficient and flexible learner?

Affective skills

- Mindfulness: practise focus, concentration, mental focus and strategies to overcome distractions.
- Perseverance: demonstrate persistence and practise delaying gratification.
- Emotional management: practise strategies to manage impulsiveness, anger, stress and anxiety.
- Self-motivation: analyze causes for failure, manage self-talk and practise positive thinking.
- Resilience: practise recovering after adversity, mistakes and failures; deal with disappointment, unmet expectations and change.

Thinking skills

Critical thinking

- Observe carefully to recognize problems.
- Gather and organize relevant information to formulate an argument.
- Recognize unstated assumptions and bias.
- Interpret data and evaluate evidence and arguments.
- Draw reasonable conclusions and test generalizations.
- Revise understanding based on new information and evidence.
- Evaluate and manage risk.
- Formulate factual, topical, conceptual and debatable questions.
- Consider ideas from multiple perspectives and develop opposing arguments.
- Break complex concepts and projects into parts and synthesize new understanding.
- Propose and evaluate solutions; identify obstacles and challenges.
- Use models and simulations; identify trends and forecast possibilities.
- Troubleshoot systems and applications.

Creative thinking

- Use brainstorming and visual diagrams to generate new ideas and inquiries.
- Consider multiple alternatives, including unlikely ones.
- Create novel solutions to authentic problems.
- Make unexpected connections between objects and ideas.
- Design improvements to existing machines, media and technologies.
- Design new machines, media and technologies.
- Ask 'what if' questions and generate testable hypotheses.
- Apply existing knowledge to generate new ideas, products or processes.
- Create original work and use existing ideas in new ways.
- Practise flexible thinking and visible-thinking strategies.
- Generate metaphors and analogies.

Transfer skills

- Use effective learning strategies across subjects and disciplines.
- Apply skills and knowledge in unfamiliar situations.
- Inquire in different contexts to gain different perspectives.
- Compare conceptual understanding across subject groups and disciplines.
- Make connections between subject groups and disciplines.
- Combine knowledge, understanding and skills to create products or solutions.
- Transfer current knowledge to learning new technologies.
- Change the context of an inquiry to gain a different perspective.

Criterion C: Reflecting

In the Personal Project, students should be able to:

- Strand i: explain the impact of the project on themselves or their learning.
- Strand ii: evaluate the product based on the success criteria.

Level	Descriptor
0	The student does not achieve a standard described by any of the descriptors below.
1-2	States the impact of the project and whether the product was achieved.
3-4	Outlines the impact; states whether the product was achieved, partially supported with evidence or examples.
5-6	Describes the impact; evaluates the product against success criteria, partially supported with evidence or examples.
7-8	Explains the impact; evaluates the product against success criteria, fully supported with specific evidence or detailed examples.

What 'impact of the project' can include

- Any aspect of inquiry, action and/or reflection.
- Progress made toward the learning goal.
- Growth as a learner, including improved ATL skills or Learner Profile attributes.
- Ways in which you have grown or changed as a result of the project.

Questions to support reflection

Reflect on learning	Reflect on yourself
What have I learned about the subject? What skills have I acquired or improved? How has this project prepared me for the future?	What have I learned about myself? How has my point of view changed? What am I most proud of?

Evaluating the product

- To what extent did I complete my product based on the success criteria?
- How can I demonstrate that I completed the product based on the success criteria?
- What are the strengths of my project?
- What could I have done differently to make the product better?

Personal Project Report

Students may submit the report in written format, recorded format, or a combination of the two in a multimedia report.

Minimum formatting requirements

- Font: Arial or Calibri.
- Minimum font size: 11 pt.
- Margins: 2 cm.
- Line spacing: 1.5.
- Evidence presented in images must be visible at the submitted size.
- Audio and video must be recorded and submitted in real time.
- Visual aids may support spoken reports, but evidence and examples shown only in video are not considered for assessment.
- The bibliography is uploaded separately and does not count toward the page limit.
- Do not include a title page; if included, it counts toward the page limit.

Written pages vs recording time

Written document	Recording
15 pages	0 minutes
14 pages	1 minutes
13 pages	2 minutes
12 pages	3 minutes
11 pages	4 minutes
10 pages	5 minutes
9 pages	6 minutes
8 pages	7 minutes
7 pages	8 minutes
6 pages	9 minutes

Checklist: Objective A - Planning

Strand	Report checklist	Evidence examples
Learning goal & personal interest	State the learning objective clearly and precisely. Explain what you want to learn and what sparked your interest. You may connect prior learning, existing skills, the Global Context or SDGs.	Brainstorms; planning sheets; proposal panel; diagrams of interests and learning goals; lists of strategies; diagrams connecting learning goal and product.
Product goal & success criteria	State and explain the intended product. Develop 4-5 specific, rigorous, realistic and testable criteria. Explain why you chose them and develop a rubric to measure product quality.	Brainstorms; planning sheets; proposal panel; final success criteria; drafts; research notes supporting the criteria.
Action plan	Develop a timeline, calendar or other planning tool with detailed short- and long-term steps. Include steps linked to each success criterion.	Series of steps; timelines; to-do lists; Gantt charts; short- and long-term plans; annotated PP timeline.

Checklist: Objective B - Applying skills

Strand	Report checklist	Evidence examples
ATL skills & learning goal	Identify the chosen ATL skill(s) and two sub-skills developed to achieve the learning objective. Explain how you used them with concrete evidence and examples.	Inquiry questions; supervisor correspondence; screenshots of reminders; conflict reflection; summary of prior learning; interview with a professional.
ATL skills & product goal	Identify the chosen ATL skill(s) and two sub-skills developed to achieve the product. Explain how you used them with concrete evidence and examples.	Inquiry questions; supervisor correspondence; screenshots of reminders; conflict reflection; summary of prior learning; interview with a professional.

Checklist: Objective C - Reflecting

Strand	Report checklist	Process Journal evidence
Impact of project	Choose at least one focus and support it with evidence: progress toward the learning objective; learning through ATL or Learner Profile development; personal development or change. Optional: future learning and deeper understanding of the Global Context or SDGs.	Summary of new knowledge or insights; audience surveys or feedback.
Evaluation of product	Use the success criteria and rubric to evaluate strengths, weaknesses and the extent to which the goal was achieved. Explain the final level using specific, measurable evidence and identify possible improvements.	Evaluation against success criteria; images of key product features; analysis of causes of success/failure; audience reviews and surveys; supervisor meeting notes.
